

LO♥EUP

FINEST HYALURONIC ACID FOR LARGER VOLUME RESTORATION

WHAT IS LOVEUP?

1 What is LOVEUP, the new concept filler?

LOVEUP is a hyaluronic acid gel filler, specifically designed for large volume restoration of face and body. LOVEUP is a non-animal synthesis hyaluronic acid (NASHA). It has 6 - 18 months longevity. LOVEUP is a sterile, apyrogenic, latex free, viscoelastic and bio-degradable gel.

2 How does LOVEUP works?

Once injected LOVEUP will expand soft tissue giving a volume effect. Results will be immediate and stable for a number of months thanks to its strong stability of HA, high level of purification and cross-linkage of HA, until reabsorption will erase the aesthetic outcome.

3 Is it face or body filler?

LOVEUP is a filler suitable for body and for face. LOVEUP must be injected in any area that needs to be filled with large volumes.

4 How must it be used?

Treatment is safe, easy and fast. LOVEUP is a filler that must be released on deep subcutaneous soft tissues of body and face. Techniques change on different areas (bolus, retrograde release, fan technique)

5 What are the main advantages?

- Safe
- Without post treatment sequelae
- Long lasting effect
- Easy and fast to perform
- Natural effect, modulable

Remould and harmonise body and face without surgery

Soft expansion of large areas

TECHNICAL DATA

Try the difference

Cross linking ratio	10 %	Duration	6-12 months
HA concentration	20 mg/ml	HA molecular weight	1.5 MDa
Cross linking agent	BDDE	Viscosity	1,8 m ³ /kg
BBDE residual	<2ppm	PH	7,0 (+/-0,5)
Bacterial endotoxin level	< 0.250 EU/ml	G' (1,5 Hz)	286 Pa

Strong stability of HA due to high level of purification and cross-linkage

TARGET AREAS

BUTTOCK

CALF, SHOULDERS, ...
